

BIO-SURE FILTER

RESTRUCTURING THE WATER

The Bio-Sure+ uses Far Infrared Ray Technology (FIR) through Quartz and Tourmaline to add a charge to the water.

ADDED ELECTROLYTES

Over 20 minerals added to promote high electrolyte water energy.

ALKALINITY BOOST

A mineral that the body needs to maintain strong bones & perform important functions.

SANITIZATION

The water is sanitized through using SafeTouch technology which utilizes silver ions to inhibit the growth of bacteria in the water.

CORAL SAND

Coral sand changes the acidic nature of water to a more alkaline state and promotes more energy and quicker healing of injury.

QUARTZ

Quartz is thought to be able to restructure water by providing an electrical (FIR) charge to water. The structured water is able to be absorbed in the cells and realize superior hydration. It also contributes to an increase in water alkalinity and supports an increase in metabolism, healing, immunity and is known to decrease chances of getting dementia.

HEMATITE

Hematite is an iron oxide mineral with a very high iron content. It supports the immune system and is very good at improving energy levels.

TOURMALINE

Tourmaline generates electricity in water which provides an infra-red capacity that generates negative ions that helps to “uncluster” the water molecules and increase the absorption properties of water at the cellular level.

ZEOLITE

Zeolite has a unique ion exchange capacity and provides a high level of immune support and has been used to assist chemotherapy patients in order to re-establish their immune system. Its purification ability in combination with silver ions is FDA approved and its health benefits lend to the support of good health.

SILVER IONS

Silver ions are naturally occurring elements and one of the most potent antimicrobials available.

HYDROXY APATITE

Hydroxy Apatite promotes ion exchange and provides negative ions and increases solubility in water. It enhances the benefits of calcium and activates the molecules to provide FIR benefits of increased absorption.

ZEO-Z1

Zeo-Z1 provides an extremely effective germicidal for the removal of bacteria in water and provides high grade calcium that is necessary for good bone and heart health.
